

TRONÇONNEUSE

SP 480

Stiga SP 480 Petrol chain saw

Allround petrol chain saw for all types of forest work.

Much effort has been done to secure the user-friendliness. The vibration is effectively damped by steel-springs according to latest technology. It has a large rear handle that contains the fuel. The air-filter is easy to access without any tool. The chain is tensioned from the side.

The SP 480 has a high safety with double acting chain brake protection as well as a large chain protection cover for front-hand.

The saw is easy to start with electronic ignition system and has an adjustable oil pump.

It has a moderate 2 stroke engine of 44 cc and 1,9 kW. Bar is available from 33 cm and up.
